

The Opioid Epidemic and Community Resources

*More than 64,000 Americans died from drug overdoses last year, most involving a prescription painkiller or an illicit opioid like heroin. This **FREE** presentation will provide information about the county's role in addressing opioid abuse..*

Topics Include:

- **National, State and Local trends**
- **The relationship between prescription pain medications and heroin.**
- **New Community resources to respond to this epidemic.**
- **The availability of Naloxone.**
- **Opioid Overdose Training with the Department of Public Health.**
